## DARDANELLES.

## FRESH PROGRESS.

## RUSSIA'S STAND.

## GERMANS CHECKED.

## ROUMANIA PREPARES.

Since the 6th inst British troops operating at the Dardanelles have successfully landed in the region of Sulva Bay, and further progress has also been made at Gaba Tepe, the troops gaining a footing on the slopes of Sari Bair. The operations are developing.

On the 12th inst a French cruiser bombarded Jaffa, and destroyed a German factory where munitions and boats were being turned out for the purpose of attacking the Suez Canal.

An Athens message states that there are 120,000 Turkish wounded in Constantinople.

On the eastern front stubborn fighting continues, and the German advance appears to have been checked.

A new battle is developing, in which von Hindenburg's armies are engaged, north of the Niemen and before Kovno.

Increased German activity is reported in the building of submarines at Hoboken, near Antwerp.

The Austrian submarine U3 has been sunk by a French destroyer in the Adriatic, the crew being made prisoners.

The preparations for war on the part of Roumania continue.

## GALLIPOLI.

## VIOLENT FIGHTING.

## NEW'S FRUITLESS ATTACKS.

PARIS, Aug. 14. A Dardanelles communiqué issued in Paris says: Since August 6 British troops have successfully landed in the region of Sari Bair. They have also made further progress at Gaba Tepe, where, after violent fighting, they gained a footing on the slopes of Sari Bair, and captured over 650 prisoners and nine machine guns.

Operations continue to develop at this point. The Turkish efforts to break our line in the south failed.

Since August 7 the operations on the French front consisted principally of aerial attacks resulting to our advantage.

A Berlin official wireless message behind the recent landings of the French and British troops in Gallipoli. It mentions that 150 men were landed at Suvla Bay, and attempted to outflank the British at Ari Burnu. The attack, it says, was repulsed.

A telegram from Berlin states that there was merely outpost fighting at Oesel between destroyers. The Russian destroyers being successfully shelled by the German fleet.

PETROGRAD, Aug. 15. The following communiqué has been issued:—

The enemy attempted to stop our offensive near Jacobstadt, Divinsk, and Wilkomir. The fighting continues. We again repulsed four German attacks on the western positions at Kovno. An artillery duel continues.

There is an important change on the Narva-Bug front. There was a desperate attack on Friday south-west of Clechanev, and there have been artillery duels and skirmishes within the approach to the defences of Novo Gorkovsk.

There was fighting with increased obstinacy on Thursday night northward of the Siedle and Lukow region.

NEW BATTLE DEVELOPING.

AMSTERDAM, Aug. 14. A Berlin communiqué states:—

A new battle is developing, in which General von Hindenburg's armies are engaged, north of the Niemen district, near Alsouf, Kupichy, Westchany, Kowarski, and before Kovno. We took a fortified forest at Dominikanka, and captured 350 men. Between the Narva and the Bug we have reached Silna, where the enemy is resisting. We stormed a strong advanced position north of Novogorsk, and captured 1800 men and four machine guns.

An Austrian communiqué states that the Austro-Hungarian, advancing from both sides of the Lukow-Brest Litovsk railway have reached a sector south-west of Miedzyrzec. Germans have conquered the Wisniec district, and crossed into the Vlodava district.

THE CAUCASUS.

## EASTERN FRONT.

## GERMANS CHECKED.

## RUSSIAN STRATEGY.

LONDON, Aug. 14. It is reported that the Germans have liberated all political prisoners at Warsaw at the request of a committee of citizens.

A Berlin communiqué says:—General von Hindenburg has made further progress attacking Kovno. We progressed between the Narva and the Bug, despite the enemy's reinforced positions on this front, where the resistance had to be broken from sector to sector.

General von Scholtz took 900 prisoners and captured three guns. On Thursday General Gellwitz took 650 prisoners. Prince Leopold of Bavaria fought his way to the sector at Sokolow, captured Siedle, and reached the Liwiec sector.

A Petrograd communiqué says:—In the Kovno district the enemy temporarily has abandoned attacks. In the Middle Vistula region in conformity with the existing conditions of the general situation, we evacuated Sokolow, Siedle, and Lukow.

The "Daily Telegraph's" Petrograd correspondent says:—The worst fury of the storm is over. Fears for the garrison near Warsaw are superfluous. It is authoritative information that the evacuation was carried out with astonishing fidelity to the plan.

The Petrograd correspondent says:—The position is strategically becoming daily stronger, and more favourable. The most interesting development is between the Narva and the Niemen. By capturing the village of Tolvain, the Russians cut the German line separating Kovno and Ulikum.

The troops were later dangerously situated, and are believed to be hurriedly retreating, either to reconnect with Poniewiez or join the troops against Kovno. The right flank of the Poniewiez troops is exposed. The operations against Kovno are extending. The Petrograd correspondent says:—The German line is now extending to the eastward of Kovno, and is now preparing platforms for 12 inch and other heavy guns. Kovno is not yet surrounded. The Russian armies are intact and free to manoeuvre.

The "Morning Post's" Petrograd correspondent states that the German advance to be definitely held in check. The Russians are in full command of the situation. The management of the Russian retreat from the Warsaw salient will probably provide a model for future tactical books on the art of war. It is daily becoming plainer that the German advance is a manoeuvre for the purpose of attempting a victory 50 or 100 miles deeper into Russian vast spaces.

The Russian line now runs roughly from Lomza to Vlodava, with a convex face towards the enemy. The enemy is astride of the railway from Warsaw, near Lublin, and is steadily being driven back as it runs further north. On the whole, the German progress suggests that they may possibly find the Russian winter before they succeed in reaching a satisfactory defensive line, so as to be able to free their real fighting forces for the western front.

The "Spectator" says the German left flank is only 50 miles from Petrograd. It now appears possible that the operations in the north will not form a part of a vast enveloping movement, but are the beginning of an attempt to seize Petrograd by a sudden dash along the coast road, which the Germans are steadily being driven back as it runs further north. On the whole, the German progress suggests that they may possibly find the Russian winter before they succeed in reaching a satisfactory defensive line, so as to be able to free their real fighting forces for the western front.

## WESTERN FRONT.

## LULL IN OPERATIONS.

## LONDON, Aug. 15.

The Germans have established three asphyxiating bomb factories in Belgium. The German authorities advise all German civilians in Belgium to repatriate with a view to escaping suffering during the winter.

A biplane descending in Dijon came into collision with a tree, and crashed to the earth. The pilot and a lieutenant were killed.

The French Chamber of Deputies has passed a bill to secure ground for cemeteries for the Allies. M. Millerand, Minister of War, introducing the bill, said that, in offering a resting-place, France was paying a fresh and striking tribute to the bravery of Britons and Belgians.

A Paris communiqué states: In Artois we destroyed by mining some of the enemy's advanced works. An ammunition depot in the enemy's lines was blown up.

A communiqué states that the enemy attacked along the whole front on the Marne-Therese sector, and were everywhere repulsed with appreciable losses.

ROTTERDAM, Aug. 14. The Allied aeroplanes destroyed two airships near Ghent. An aeroplane was also destroyed.

CAPTAIN SMART'S HEROISM.

LONDON, Aug. 14. Lieutenant Butler describes the exploit of the late Captain Smart, who was formerly attached to the forces in India, and enlisted under the name of Thomas Hardy. He was almost 90 yards from a German trench when he was wounded on the right shoulder. I shouted, "Hardy, go back." He answered, "It's all right, I'm left-handed." Then he rushed off and commenced to slam bombs at the enemy. He went on like that for 20 or 30 yards, when he was shot through the head, which was half blown off. He was of splendid physique. It would be impossible to find a more fearless fellow. We all loved him.

SERBIA.

RENEWED FIGHTING.

NIS, Aug. 14. A communiqué states: Our infantry and artillery on Monday defeated the enemy's attempt to strengthen himself on certain points on the left bank of the Save and on the Danube.

Our artillery on Monday night effectively attacked supply columns between Berchova and Orchava, and in the vicinity of Sokolatz. The enemy on the same night opened a violent infantry and artillery fire on our positions at Dogni Milanovatz. Our artillery promptly silenced him.

The enemy on Tuesday attempted to land on the right bank of the Danube, near Golubac. We allowed the troops to approach within 15 yards of the shore. We then opened a sustained fire.

BECHAREST, Aug. 14. The Austrians on Tuesday bombarded Orsova. Hungarian reinforcements attempted to land at Orsova, but failed.

LONDON, Aug. 15. The newspapers interpret the attempt to cross the Danube at Golubac as a demonstration intended to intimidate Roumania, or as a beginning in the carrying out of the Orsova plan reported from Salonika on the 9th inst—the massing of two Austro-German forces at Orsova with a view to traversing Serbia and Bulgaria to assist the Turks.

Dr. T. Aherne writes that although the typhus epidemic has disappeared from Serbia, there are many useful indications of gauging of the illness and heart weakness. One of the sad cases is that of a man in the Knezevatz hospital, who has had both thighs amputated.

ROUMANIA.

GERMAN THREATS.

ROME, Aug. 14. Official advice from Bucharest states that a German commercial attaché requested the Finance Minister to allow German firms to pass into Bulgaria, which is neutral, and threatened energetic action in the event of refusal.

The Minister refused permission to blank. The Ministerial Council approved of the reply.

BECHAREST, Aug. 15. The Minister for War has instructed the factories working for the military authorities to prepare a list of mobilisable workers, with a view to expediting the execution of orders.

SWITZERLAND.

GERMAN IMPORT BOARD.

LONDON, Aug. 14. The "Daily Telegraph's" correspondent states that the negotiations of the Allies to prevent Switzerland's imports being exported to Germany are proceeding slowly. Germany has established a board in Zurich to control the importation of German goods with inglorious powers, yet when the Allies ask for a guarantee against re-exportation of their goods, Switzerland indignantly regards it as an unworthy attempt to violate her neutrality and wound her national dignity.

LONDON, Aug. 15. Reuter's Zurich correspondent states that the Import Trust negotiations at Berne have resulted in a deadlock. A Government Trust has been found practically impossible, because of the State owning and operating the Federal railways making it the largest consumer of German coal.

On the other hand, Swiss industrial and commercial undertakings which are using electricity from natural water power are virtually independent of German coal, and hence are ready to accept the trust along the lines suggested by the Allies. This would be private and unofficial, similar to the Dutch trust, but the creation of a private trust appears to be difficult, since it might possibly be construed as an affront to the Federal Government after diplomatic efforts to reach an understanding with the State.

ITALY'S CAMPAIGN.

ALPINE STRUGGLE.

OPERATIONS ON ISONZO.

ROME, Aug. 14. There is a great lack of wool for soldiers' garments. The Milan "Corriere della Sera" urges the Government to press Britain to permit exportation to Italy.

The Austrian official version of the bombardment by Austrian destroyers of Bari, Santo Spirito, and Manifattura, says:—We heavily bombarded four manufacturing, injured three civilians, eleven women, and nine children, and damaged fourteen houses.

The Zepplins were engaged at some points, but succeeded in escaping from our aircraft patrols. One was probably damaged by the mobile anti-aircraft section.

## SUBMARINES.

## GERMAN ACTIVITY.

## THE HOBOKEN YARDS.

AMSTERDAM, Aug. 14. A special correspondent of the "Telegraf" recently visited the German submarine yards at Hoboken, near Antwerp. Since March 10, he says, nine submarines have been constructed.

British airmen almost entirely destroyed one on April 26. Two have been launched, and are now in service. The remainder are rapidly approaching completion.

Since the successful British air attack every possible precaution against aerial bombing has been taken. The yard has been roofed with steel plating. This is covered with leaden sheets. Her shrouds are rapidly approaching completion.

Only the hulls of the vessels are constructed at Hoboken. All the interior parts are made in Germany.

One submarine from the Hoboken yards has already been lost. It was called Kaiser Wilhelm II., and carried three officers, one petty officer, and 12 men.

THE LOSS OF THE INDIA.

CHRISTIANIA, Aug. 14. The Norwegian Government has protested against German vessels attacking one of its fishing boats, which is Norwegian territory throughout its entire length.

MORE STEAMERS SUNK.

LONDON, Aug. 13. The Grimby trawler Thrush has been sunk. The crew were in the boats from Monday to Thursday, and were terribly exhausted.

The steamer Summerfield has been sunk. The chief engineer, the chief officer, and his wife being drowned.

The steamer Jacona and the Norwegian steamer Auro were also sunk.

The Glasgow steamer Culo (1345 tons), and the fishing smack Amethyst have been sunk by submarines. Their crews were saved.

Copenhagen reports that the Danish barque Norna has been sunk. The crew were landed.

PEACE TALK.

A MYSTERIOUS VOICE.

LONDON, Aug. 13. An Italian greenback discloses that the Ambassadors at Nish, Sofia, Berlin, and Petrograd reported the Austro-German peace overture. Petrograd telegraphed on March 20:—Learn from an unimpeachable source that some one speaking in the name of Austria-Hungary has addressed a serious attempt to make peace with Russia.

A telegram from Berlin says that Dr. Liebknecht, writing from the eastern front, gives notice that he will ask in the Reichstag, whether the Government is disposed to abandon the idea of any annexation whatever, and enter into immediate negotiations, if the other belligerents are similarly inclined.

THE CAMEROONS.

ALLIES' SUCCESS.

PARIS, Aug. 13. The Allies' forces in the Cameroons have occupied an important post at Tignere, near Nguendere. The enemy on being reinforced retreated, but were repulsed. The Allies' losses were slight, but the enemy's considerable.

SOUTH-WEST AFRICA.

LONDON, Aug. 14. An officer, who took part in the South-West African campaign, states that there were ten mines across a roadway 8 ft wide, and three more on the railway line. They would have killed everyone within a hundred yards had they not been discovered.

As it was, General Botha was nearly killed by the explosion of one mine, which killed one of his attendants.

ALIENS IN INDIA.

METHOD OF TREATMENT.

SIMLA, Aug. 13. For some time past the subject of the treatment of Germans and Austrians in India has been occupying the attention of the press and public, and the Government of India to-day issued a detailed statement of the action taken. When war broke out, the subjects of these nations were registered, disarmed, and placed under police surveillance, and only allowed to travel on permit. On August 26 special powers were taken under the Foreigners Ordinance to prohibit, regulate the entry, departure, and residences of foreigners. As regards Germans and Austrians of military age, authority has been delegated to the military, the charge of the remainder resting with the civil officers. Those of military age have been interned as prisoners of war at Ahmednagar, Bombay, and now number 1143. Over the rest that degree of supervision has been exercised which is required to prevent their endangering the interests of the State. Special consideration was shown to missionaries, and if of good behaviour they were allowed to remain at their posts. Paroles were issued by responsible British subjects are isolated upon.

As the war proceeded most provinces found it necessary to enforce stricter control over individuals whose conduct appeared objectionable. This usually took the form of concentrating them at convenient centres, away from normal residence, where supervision was easier. The latest available figures, liable, however, to fluctuation, show that 1232 Germans and Austrians are in civil charge, namely 405 men, 513 women, and 186 children, and 127 suspected. Of these 586 are missionaries, and families. In all 536 have been concentrated at various centres, and the remainder are in normal residence.

The prolongation of the war and bitterness engendered by German savagery have now altered the position, while adding to continued strain of supervision. Accordingly, it has been decided, with the approval of the Secretary of State, to repatriate all women and children and men of non-military age, and the war will be carried out as soon as the necessary arrangements can be made. Prior to the war, German and Austrian missions in some cases in respect to educational and philanthropic work were in receipt of Government assistance. Orders to discontinue grants have been issued. The question of non-military age, and the war will be carried out as soon as the necessary arrangements can be made. Prior to the war, German and Austrian missions in some cases in respect to educational and philanthropic work were in receipt of Government assistance. Orders to discontinue grants have been issued.
